Samsung S24 Ultra Reviews: I bought it on the actual
day of the launching (January 17th) during the Samsung Unpacked event, and my preorder arrived on

January 25th which was actually 1 week before the official retail day. That part alone is already an amazing experience!

The unboxing experience is superb as Samsung has finally mastered the "suspense" portion of the package unboxing experience. Although we know Samsung is trying to commit for a greener future, it would have been nice if we went back to getting the free accessories we once used to get (I think the last one was the Note 20 Ultra).

The phone itself has a premium build quality aesthetic, and though now opting for a flat display, still has the nice curved body frame which allows for a better grip. The titanium finish on the frame ... [More](#)

Trade AI/titanium for better fingerprint sensor...

28 January, 2024

After using and testing the phone for three days I can report that my prejudices stay intact, I will try to be as impartial as I can be and only talk about my own experience, in terms of pros and cons.

Pros: 1. the phone is snappier than before, not by much, but still. 2. The speakers are louder, albeit with distortion. 3. The 10x zoom on camera is better, if anything, not worse than before, even though it's no longer optical but hybrid.

Cons: 1: the fingerprint sensor is the same one they used in s21 ultra, it's terrible and still doesn't work most of the time. 2: the phone is just as heavy as before, even with a titanium frame. 3: battery life is worse. 4: the screen doesn't seem to be any brighter than it was in s23 ultra. 5: the 3-button gesture navigation is ... very good; as expected

25 January, 2024

Purchased on the 17th of January 23 .. so pretty much during the unveil event.

pros:

- great quality build! the phone feels absolutely amazing in terms of haptics. It is very large though
- i am a fan of the flat(ter) screen. Since i have the note (i mean ultra) primarily for note taking - this is a really significant change for me.
- i highly (i cannot stress that enough ...) Samsungs dedication to 7 years of updates! - the reason i migrated from my Note 20 ultra to a temp phone while waiting for the s24 ultra (i was on an iphone briefly)
- was because Samsung would not update the Note 20 anymore (boooo!!)
- even bezels - i never understood why Samsung would refuse to do it. iPhones had even bezels forever .. and its not like Samsung could not do it (because ... [More](#)

More than just a phone!!!!

28 January, 2024

As expected the phone is perfect just like the S23ultra. After a bit getting used to a few changes that to my opinion makes navigation easier, I love it. The camera is out of this world. Battery life is a bit longer than the previous model which was great already. The live translation is fantastic. I hope they will add more languages soon. Korean and Chinese is on there which we both will test this summer. The screen is the best. Hardly any reflection and that will make use in summer so much better. Best phone ever!!!!

Perfect Upgrade

28 January, 2024

I haven't had much time to play with the phone since getting it. As been busy with work. But it so far is a great upgrade from my S23 Ultra. It feels so much more better quality with the titanium case. Took a few photos I personally haven't noticed much difference in quality from the S23 Ultra. But I'm not professional. The smoothness of everything is another level. Loading apps switching screens etc. The phone is so fast it's a pleasure to use.

Exceptional Design, Brilliant Display

26 January, 2024

The Samsung S24 Ultra impresses with its sleek design and premium build quality. The stunning AMOLED display offers vibrant visuals, setting a new standard for mobile screens. With robust performance, a versatile camera system, and commendable battery life, the S24 Ultra delivers a top-tier smartphone experience. While the price is premium, the investment is justified for those seeking a device that seamlessly combines style and innovation.

big upgrade from older phone!

28 January, 2024

Upgrading from an S21 ultra and the difference is pretty substantial. Although I've only had it a few days the standout features are the cameras and the AI photo editing. Frankly I just keep going through photos and editing them! Also there are lots of little things that let you tweak and change to personalise your phone most of which were unavailable on my last phone. I don't know if you would notice a great deal of difference from an S23 ultra but if you have an older model like I did it's worth the upgrade.

Display issues galore

28 January, 2024

Overall not happy with the phone out of the box. The display is much less vibrant, has washed out colours compared to the S21 ultra I came from. The display also has a grainy effect when viewing greys at low light levels. For a £1300 phone I don't expect this issues. It could be software related but if no update fixes this within the return period it's going back.

The Must Updated Phone !

20 January, 2024

Many new futures to talk about ! ,
the must important thing is the New Galaxy AI helps with everything from transcribe the call to on call
translate to other language , also the new Camera/Photo editing futures are insane !
Samsung notes now are smarter than ever with many useful updated things that makes it awesome for
writing and editing phrases .

Great features, the AI is great, camera really goo
26 January, 2024

Great phone so far, good weight, feels immediately premium out of the box, the titanium grey is even better
live. Great quality screen as it is expected. Night camera is good, but still could improve comparing to vivo
x100 or OnePlus 12, but not much difference, but great shots and video overall.
